

FLOOD LIGHT SERIES

PAKLITE Flood Light series used with high power magnetic ballast to give extensive light output for security purposes. PAKLITE quality fixture with correct light distribution system would make Flood Light a boundary watchman.

FEATURES

- Strong installation and tilting mechanism.
- Electrostatic powder painted surface for extra protection against rough environment.
- Special high pressure aluminum die-casted body.
- No induction of dust and insects thus reduces maintenance cost to its minimum.
- Reflector is made of pure aluminum plate and the surface is treated with anodic oxidation.
- Sealing ring is made of high temperature resistant silicon rubber.
- Light distribution is such designed to cover broader area in focused position.
- Pre fitted with Paklite quality ballast and igniter.

FD250

FLOOD LIGHT SERIES

APPLICATIONS

- Under Constructions
- Mega Projects
- Flyovers
- Stadiums
- Sports Complexes
- Inter Changes
- Show Rooms
- Boundary Walls
- Searching Areas
- Shopping Plazas
- Highlight Elevations

SPECIFICATIONS:

Item Code	Description	Length	Width	Height	Watts	Screw Distance	Amp.
FD125-M	Flood Light for 125 Watt Mercury Lamp	435	415	145	125	85	1.15
FD150-S	Flood Light for 150 Watt Sodium Lamp	435	415	145	150	85	1.80
FD250-M	Flood Light for 250 Watt Mercury Lamp	435	415	145	250	85	2.15
FD250-S	Flood Light for 250 Watt Sodium Lamp	435	415	145	250	85	3
FD250-H	Flood Light for 250 Watt Hallogen Lamp	435	415	145	250	85	3
FD400-M	Flood Light for 400 Watt Mercury Lamp	435	415	145	400	85	3.25
FD400-S	Flood Light for 400 Watt Sodium Lamp	435	415	145	400	85	4.45
